

Cookie Consent Subscription Agreement

Consent technology is effective only when the customer has defined its purposes, vendors and lawful choices.

01 / Conditional service

This is a framework for a separately contracted consent-management service, not a claim that VISIONCYBERX licenses a cookie platform. An order must identify the platform operator, subscription, deployment scope, fees, support and data roles.

02 / Customer governance

The website operator is responsible for a current cookie inventory, purpose and vendor descriptions, prior consent where required, a workable refusal and withdrawal path, and consistency between banner, settings and notice. Implementation must be tested against applicable ePrivacy and data-protection requirements.

03 / Evidence and change

The agreed service should retain configuration history and consent evidence as required, support re-assessment after tracker changes, and define export and exit. Platform uptime and liability belong in the signed vendor and service terms.

Document status

Original VISIONCYBERX working framework for review. This PDF is not an offer, a signed agreement or evidence of an implemented control. Confirm legal entity details, service scope, commercial terms, annexes and approval before use. A signed engagement document governs.
