

End User License Agreement

Software rights follow the actual supplier and the signed order. Brokerage and advice do not automatically include a software licence.

01 / Contract boundary

This framework applies only if an order expressly identifies a VISIONCYBERX-licensed deliverable. A third-party product remains subject to its vendor's own licence, order and support terms. The parties must identify the licensor, product, users, territory, term and permitted purpose before signing.

02 / Permitted use and ownership

An agreed licence should be limited, non-exclusive and non-transferable for the stated internal business purpose. Intellectual property remains with its owner; customer data remains under the customer's control. No right to source code, resale or sublicensing is implied.

03 / Security and exit

The order must define access controls, security responsibilities, updates, support, data export and end-of-term handling. Availability, warranties, fees and liability limits require specific written terms; this public framework supplies none.

Document status

Original VISIONCYBERX working framework for review. This PDF is not an offer, a signed agreement or evidence of an implemented control. Confirm legal entity details, service scope, commercial terms, annexes and approval before use. A signed engagement document governs.
