

ESG Policy

Environmental, social and governance considerations belong in the same decision record as security and commercial fit.

01 / Environment

When selecting technology, examine hosting footprint, equipment lifecycle, energy use and avoidable duplication where decision-relevant. Do not state an emissions reduction or certification without measured evidence and defined boundaries.

02 / Social

Consider worker welfare, accessibility, privacy and the impact of cyber incidents on people and essential services. Expectations of suppliers should be proportionate to the relationship and supported by due diligence.

03 / Governance

Make ownership, conflicts, risk acceptance and evidence visible to decision makers. ESG reporting duties depend on the entity, size and applicable law; this position does not assert that VISIONCYBERX is subject to a specific reporting regime.

Document status

Original VISIONCYBERX working framework for review. This PDF is not an offer, a signed agreement or evidence of an implemented control. Confirm legal entity details, service scope, commercial terms, annexes and approval before use. A signed engagement document governs.
