

Evaluation Agreement

A proof of concept should answer a documented decision question, with proportionate controls and a defined exit.

01 / Scope and acceptance

The evaluation plan should identify the technology, owner, environment, duration, permitted test activities, success criteria, evidence and decision date. Production use, resale and onward disclosure are outside scope unless expressly agreed.

02 / Data and safety

Use synthetic or minimised data where possible. If personal data is processed on a customer's behalf, put the necessary Article 28 GDPR terms and security measures in place before access. OT testing also needs change control, safety review and rollback authority.

03 / End of evaluation

The parties should agree how credentials, datasets, logs, configurations and test environments are removed or returned. Any later subscription, implementation or licence requires a separate written order.

Document status

Original VISIONCYBERX working framework for review. This PDF is not an offer, a signed agreement or evidence of an implemented control. Confirm legal entity details, service scope, commercial terms, annexes and approval before use. A signed engagement document governs.
